

CRIQ

Sawmill Technologies

Innovation in the realm of wood processing

CRIQ develops state-of-the-art equipment for wood processing and value-added products in order to:

- maximize product value
- standardize production quality
- reduce operating costs

Jack Pine Detector

Several innovative and high-performance equipment achievements such as:

- Chips management system
- Jack pine detector
- Lumber grading optimizer (marketed by OPTIFOR)
- Weight sorter for moisture detection (marketed by OPTIFOR)

Chips Management System

As an unsurpassed innovator and expert in manufacturing and environmental technologies, industrial information and standardization, CRIQ offers its clientele highly competitive solutions in numerous industrial sectors.
