

DISCLAIMER

The primary objective of presenting some typical Standards Assessment Reports is to facilitate the understanding of the various steps and planning involved in the product exportation process. Consequently, please note that the typical Standards Assessment Reports are only shown for examples.

You should not consider that these reports are adapted to your own products. As a matter of fact, each product has its own characteristics and before marketing it in a given territory, it absolutely requires an evaluation of its distinctive features and a validation as a function of its characteristics, its utilization, and the targeted territory.

Consequently, CRIQ denies any responsibilities related to the utilization of the typical Standards Assessment Reports or the mentioned references.

Furthermore, information contained in those documents has not been updated, since they have been created.
