ICRIQ.COM offers a new FREE service – *Infoproduct*

Québec, January 22, 2007 – A new service is now available free of charge on icriq.com. *Infoproduct* helps business people from here and abroad to find suppliers or business partners in Québec.

Infoproduct helps to discover new suppliers and is time-efficient, since you can select more than one product at a time. The *Infoproduct* user can know in an instant which Québec manufacturer or wholesaler offers his selected products. Moreover, at each consultation, *Infoproduct* presents an updated result that takes into account all the changes made on icriq.com since the last visit. The user is thus informed when a selected product is offered by a new Québec company, or if an existing company has begun manufacturing or wholesaling it.

icriq.com is a service offered by the Centre de recherche industrielle du Québec (CRIQ). The site publishes, free of charge, information about Québec's industrial companies in an effort to support economic development.
