

Sustainable Productivity

Business Productivity Program

If a business is to continue to progress and grow, it must have a thorough understanding and mastery of operations, not to mention a sustainable, global vision.

CRIQ professionals use tried-and-tested tools and methods to help you identify, prioritize, and act on the most important issues. They recommend action and provide you with the information and contacts you need to make your project a success. Actions are then prioritized with stakeholders and added to a final report.

The program is profitable for any business and typically means:

- Increasing productivity and profitability
- Adapting cleaner manufacturing technologies
- Implementing better business practices
- Creating new jobs
- Having readier funding access

Sustainable Productivity

Business Productivity Program

APPROACH

1. Observe

- Record data for the business, offices, and factory floor.
- Map procedures and material flows.
- Approve maps and assumptions with the client.

2. Analyze (understand)

- Analyze data with an eye to better productivity practices and sustainable development principles.
- Issue a series of recommendations and actions for economic, social, and environmental production issues.

3. Prioritize

- Sit down with a business team and prioritize each action and recommendation in the report and add to an implementation plan.
- Produce an analysis report and present it to the business.

4. Act

- Launch the implementation plan and walk the business through the first steps.

BENEFITS

- Better knowledge of operations
- Greater staff involvement
- Time-sensitive actions and recommendations prioritized to...
 - Boost productivity
 - Cut costs
 - Put in place profitable, effective solutions
 - Comply with standards and regulations
 - Obtain a competitive advantage
 - Reduce your environmental footprint
 - Improve your image
