

# Exports Standards Overview

Requirements, costs, and timeframes for exporting your product

The export standards overview sets out, in clear and simple terms, the requirements, costs, and timeframes your product will have to comply with to be sold outside Québec.

CRIQ's made-to-measure action plan will help open new markets to your product. CRIQ can help you with:

- Technical requirements that must be met (laws, regulations, standards, and specifications)
- Information on who to contact for authorizations and certifications
- A cost estimate and timelines for certification tests

# Exports Standards Overview

## Requirements, costs, and timeframes for exporting your product

Whether you're an experienced exporter or taking your first steps, CRIQ provides an extensive range of services to help you comply with the technical constraints of marketing outside Québec.
